

Immunoblot

Ponceau staining

S1 Fig. Detection of ANKH in HEK293 cells overproducing ANKH^{wt} or ANKH^{L244S} using rabbit anti-ANKH (C-terminal region, OAAB06341, Aviva Systems Biology). Mouse anti-Na⁺/K⁺-ATPase (ab7671, ABCAM) was used as a loading control. Boxed areas: approximate region of blot presented in panel A of Figure 1.¹⁾ membrane fraction of HEK293-ANKH^{wt} clone C3.²⁾ membrane fraction of HEK293 parental cells
